

In the specification:

Please amend the paragraph on page 2, lines 26-32 as follows:

According to one aspect of the present invention, there is provided a game comprising: multiple base structures, each of said base structures having at least one ~~or more~~ substantially planar playing surface thereon, at least one of said playing surfaces being non-horizontal; and multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner in accordance with rules for playing the game.

Please insert the following paragraph at page 4, line 7:

According to yet another aspect, there is provided a game comprising: multiple base structures, each of said base structures having at least one substantially planar playing surface thereon; multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner in accordance with rules for playing the game, said playing pieces varying in size according to a predetermined number of preselected sizes, wherein the number of said base structures is equal to said predetermined number of said preselected sizes of said playing pieces.

Please amend the paragraph on page 3, lines 8-16 as follows:

According to a further aspect of the present invention, there is also provided a method of game play comprising: assembling multiple base structures on a surface, each of said base structures having at least one ~~or more~~ substantially planar playing surface thereon, at least one of said playing surfaces being non-

horizontal; providing multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner; selecting one of said playing pieces and one of said base structures; and placing said selected playing piece on one of said playing surfaces on said selected base structure.

Please insert the following paragraph at page 4, line 17:

According to another aspect, there is provided a further method of game play comprising: assembling multiple base structures on a surface, each of said base structures having at least one substantially planar playing surface thereon; providing multiple non-uniformly shaped playing pieces suitable for stacking on said playing surfaces in an unrestricted manner, said playing pieces varying in size according to a predetermined number of preselected sizes; selecting one of said playing pieces and one of said base structures; and placing said selected playing piece on one of said playing surfaces on said selected base structure, wherein the number of said base structures is equal to said predetermined number of said preselected sizes of said playing pieces.
